Subject: Microsoft Settlement

As a Microsoft software user, I send this message to urge you to settle the litigation brought against the company with all due dispatch. I believe the proposed settlement is fair, had been found such by many of the States who were involved. It is time to get this litigation behind us and let this segment of our economy operate in freedom once again (subject of course to the rules as have been redefined). Please let this litigation be ended in the way that has been deemed appropriate by many of the litigants; let Microsoft get back to business! Thank you, John K. Williams
